
Declaration and Policy on Conflict-Minerals

T.E.R. Tecno Elettrica Ravasi S.r.l. supports the principles of responsible sourcing of raw materials and opposes the use of minerals whose extraction and trade may contribute to the financing of armed conflicts or be associated with serious human rights violations.

In this context, T.E.R. Tecno Elettrica Ravasi S.r.l. takes into account the principles and requirements set forth in **Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act** and the related regulations issued by the **U.S. Securities and Exchange Commission (SEC)**, as well as **Regulation (EU) 2017/821**.

The minerals concerned are **tin, tantalum, tungsten and gold**, commonly referred to by the acronym **3TG**.

U.S. legislation focuses in particular on the origin of 3TG from the **Democratic Republic of the Congo (DRC) and its adjoining countries**, while Regulation (EU) 2017/821 adopts a broader geographical scope, referring to **Conflict-Affected and High-Risk Areas (CAHRAs)**.

T.E.R. Tecno Elettrica Ravasi S.r.l. does not purchase 3TG directly from mines, smelters or refiners and therefore operates downstream in the relevant supply chain. The Company engages its suppliers in the process of verifying the origin of any 3TG that may be present in purchased materials, components and products, with the aim of promoting responsible sourcing.

Based on the information available and the declarations received from its suppliers, T.E.R. Tecno Elettrica Ravasi S.r.l. is not aware of the use, in the products it supplies, of 3TG originating from sources that do not comply with the responsible sourcing principles referred to above.

T.E.R. Tecno Elettrica Ravasi S.r.l. is committed to continuing its cooperation with its suppliers to promote transparency and traceability throughout its supply chain.
